DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, 17, and 18, drawn to a method, classified in class 156, subclass 295.
- II. Claims 16 and 19, drawn to a product, classified in class 428.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make another and materially different product such as a product that is not an OLED and has an opaque cover plate. Additionally, the product as claimed can be made by another and materially different process, such as a process wherein the flowable adhesive material is made to flow to the nearest edge or edges of the flow-preventing pattern before engaging the cover plate.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Raymond L. Owens to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1733

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
